**Abstract of EP 1051962 (A1)**

A prophylactic tooth care composition (I) contains (a) flat or distorted lamellar particles of mineral (especially perlite) main polishing component, (b) nonionic surfactant and optionally (c) emulsifier. (I) has a total content of polishing agents and surfactants of at least 30 wt. % (preferably at least 70 wt. %) and an emulsifier content of 0-2 wt. %.
